MAINTENANCE AND CARE GUIDE

ZUMA CHAIR

General care for Velvet:

- Over time, velvet can become crushed and change in appearance slightly, however, there are some simple measures you can take to preserve its softness and alluring appeal.
- For items of velvet furniture that are facing heavy use, it's advisable to gently vacuum the fabric with an upholstery attachment at least once a week. Alternatively, you can also use a soft bristled brush or clothes brush, ensuring to brush in the direction of the nap of the fabric.
- Velvet is prone to marking, so be mindful not to leave anything heavy resting on your furniture for too long as this can cause marks and dents. Should this happen, pressure marks can be easily removed through light steaming and brushing the affected area.
- To help prevent wrinkles, especially on sofas or armchairs where cushions and covers can be removed, it's worth turning and shaking them regularly. This will help to avoid any long-term creases which may be more difficult to remove.
